Final details

From the 18th August 2025 on <https://ca-rosé.ch/lom-2025>

Terrain and courses

The large size of the Montagne de Lussy forest gives us a lot of flexibility in planning the courses. This is a typical forest of the Swiss plateau, with many changes between areas with good visibility and runnability, and others with denser vegetation. Route choice and precise orienteering in the detailed areas will be crucial for a quick race time. With a good path network, this forest is also ideal for beginners.
